Apps Script Web App Ideas

Concise preview for school admin and clerical workflows.

Quick taste of the full guide: These are beginner-friendly project ideas for Google Apps Script web apps. The full version expands each idea with starter prompts, suggested pages, specific setup notes, school workflow examples, security reminders, and what the project teaches.

Student Support, Office Workflows, Dashboards, and Communication

1. Behavior Incident Intake and Review Portal
Staff submit behavior incidents, while administrators review, assign, chart, and close items from a dashboard.

2. Attendance Early Warning Dashboard
A web app highlights students with attendance concerns using KPI cards, filters, student detail views, and follow-up drafts.

3. Intervention Tracker Web App
Teams track supports, owners, due dates, overdue follow-ups, and printable student support summaries.

4. Family Contact Log Portal
Staff log calls, emails, and meetings so teams can search contact history and see who needs follow-up.

5. Staff Request and Ticket Portal
A simple help desk routes staff requests, assigns owners, tracks status, and keeps communication in one place.

6. Enrollment Document Collection Portal
Families or staff submit required items, and office staff use a checklist dashboard to review what is missing or complete.

7. Records Request Tracker
Clerical teams track student records requests, due dates, file links, assignments, and completion status.

8. Parent Conference Scheduler
Families select available slots, the app prevents overbooking, sends confirmations, and creates calendar events.

9. Counseling Referral and Check-In Portal
Staff submit counseling referrals or check-ins, and counselors triage urgency, status, and follow-up.

10. Student Check-In Dashboard
Quick student check-ins become trend charts, follow-up flags, and searchable student history.

11. Discipline Dashboard and Reports Center
Behavior data turns into KPIs, Chart.js graphs, filters, and printable leadership reports.

12. Office Appointment and Visitor Log
Front office staff track appointments or visits with daily dashboards, status updates, notes, and printable logs.

13. Transportation Change Request Portal
Families or staff submit transportation changes, and the office reviews, approves, confirms, and prints daily reports.

14. Chromebook or Device Repair Portal
Students or staff submit device issues, upload supporting files, and track repair assignments and status.

15. Inventory Checkout Web App
Equipment checkout and returns are tracked with due dates, overdue dashboards, and reminder messages.

16. Staff Duty and Coverage Scheduler
Administrators manage duty or coverage requests, open assignments, calendar events, and staff reminders.

Apps Script Web App Ideas

Concise preview, continued.

17. Professional Learning Sign-Up Portal
Staff register for sessions with capacity limits, waitlists, confirmations, and attendance dashboards.

18. Field Trip Approval Workflow
Trip requests move through uploads, reviewer buttons, email updates, and printable approval summaries.

19. Purchase or Reimbursement Request Portal
Staff submit spending requests with receipts, while approvers track uploads, decisions, statuses, and budget summaries.

20. Data Quality Review Web App
The app finds missing fields, duplicate IDs, invalid emails, inconsistent statuses, and date problems in school data.

21. Missing Forms and Compliance Tracker
Teams monitor required forms, missing items, completion status, and family follow-up drafts.

22. Student Support Meeting Agenda Generator
Selected student data fills an agenda template so teams can prepare consistent meeting documents.

23. Award and Certificate Generator
A web form creates personalized Docs using placeholders such as `{{StudentName}}`, award name, and date.

24. Family Resource Request Portal
Families or staff request support resources, and the school routes, tracks, and protects sensitive information.

25. QR Code Request Portal
A mobile-friendly form opens from a QR code so users can submit requests from hallways, offices, or events.

26. Role-Based Admin Hub
Different users see different pages, buttons, and data based on approved emails or roles stored in a Sheet.

27. Settings-Controlled Web App
Admins update categories, routing emails, thresholds, labels, and display text without editing code.

28. Printable Leadership Report Center
Filtered KPI summaries, graphs, and narrative notes become print-friendly reports for meetings.

29. Email Preview and Draft Center
Users preview generated messages before creating Gmail drafts or sending communication.

30. Student Concern Triage Portal
Teams categorize, prioritize, assign, and follow up on academic, behavior, attendance, or wellbeing concerns.

31. Early College, Credit, or Graduation Tracker
Requirements and milestones are displayed with on-track status, missing items, and follow-up flags.

32. Help Desk Knowledge and Request Hub
A single web app combines FAQs, resource links, a request form, and a ticket dashboard.

What the full version adds: one page per project, stronger starter prompts, suggested web app pages, setup details, school use cases, feature vocabulary, and security notes for sharing school data responsibly.
